AP BIOLOGY
CELLULAR ENERGETICS
ACTIVITY #2

NAME_____

DATE_____HOUR_____

CELLULAR RESPIRATION

SUMMARY EQUATION

STEPWISE REDOX REACTION

Oxidation:
Reduction:
$Xe^- + Y \rightarrow X + Ye^-$
$CH_4 + 2O_2 \rightarrow CO_2 + H_2O + energy$
$C_6H_{12}O_6 + 6O_2 \rightarrow 6CO_2 + 6H_2O + energy$

ROLE OF NAD+

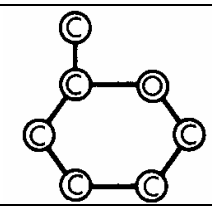
PHOSPHORYLATION

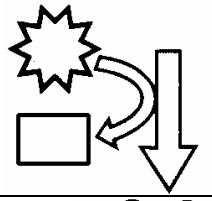
SUBSTRATE LEVEL	OXIDATIVE

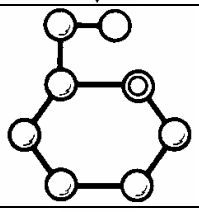
STRUCTURE OF MITOCHONDRION

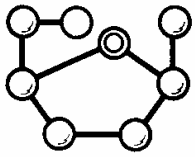
GYCOLYSIS

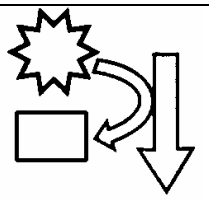
	
	
	
	
	
	
	
	
	

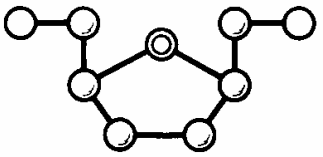


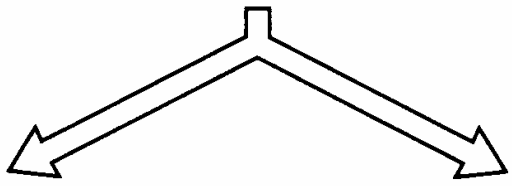






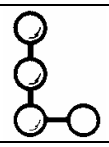


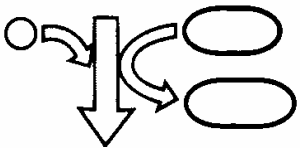


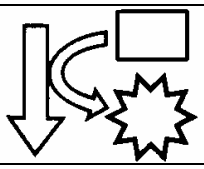


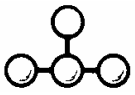
GLYCOLYSIS

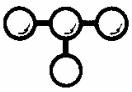
	
	
	
	
	
	
	
	
	
	
	

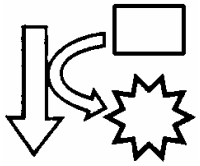


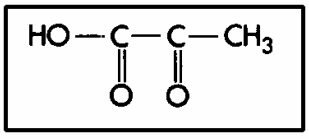










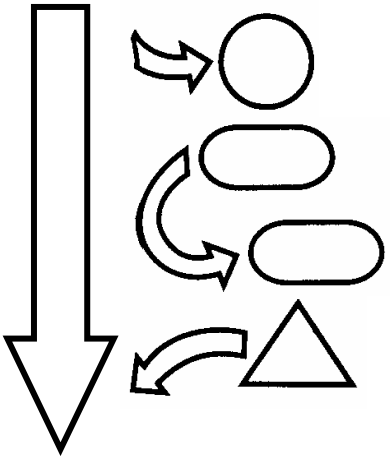


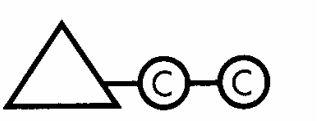
GLYCOLYSIS SUMMARY

ENERGY INVESTMENT	
ENERGY YIELDING	
IN	**OUT**

KREBS CYCLE – ACETYL COA PREP





ACETYL CO A PREP PER PYRUVATE

In	OUT

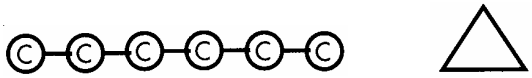
ACETYL CO A PREP PER GLUCOSE

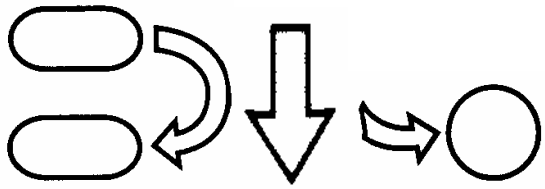
In	OUT

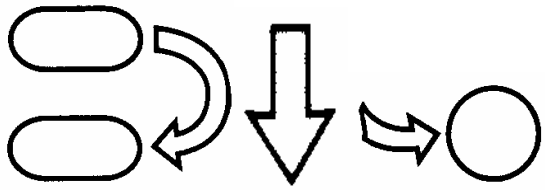
KREBS CYCLE

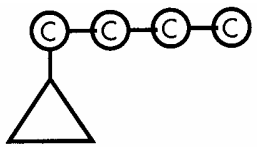
	
	
	
	
	
	
	
	
	

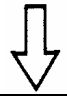
	
	
	
	
	
	
	
	
	
	

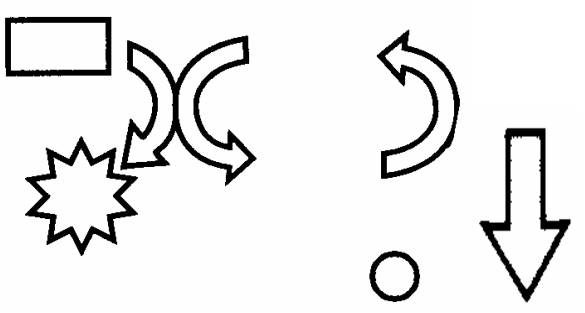


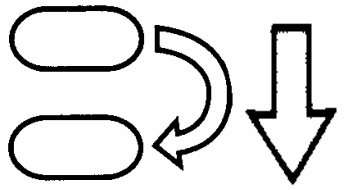


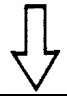


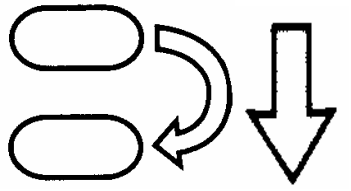












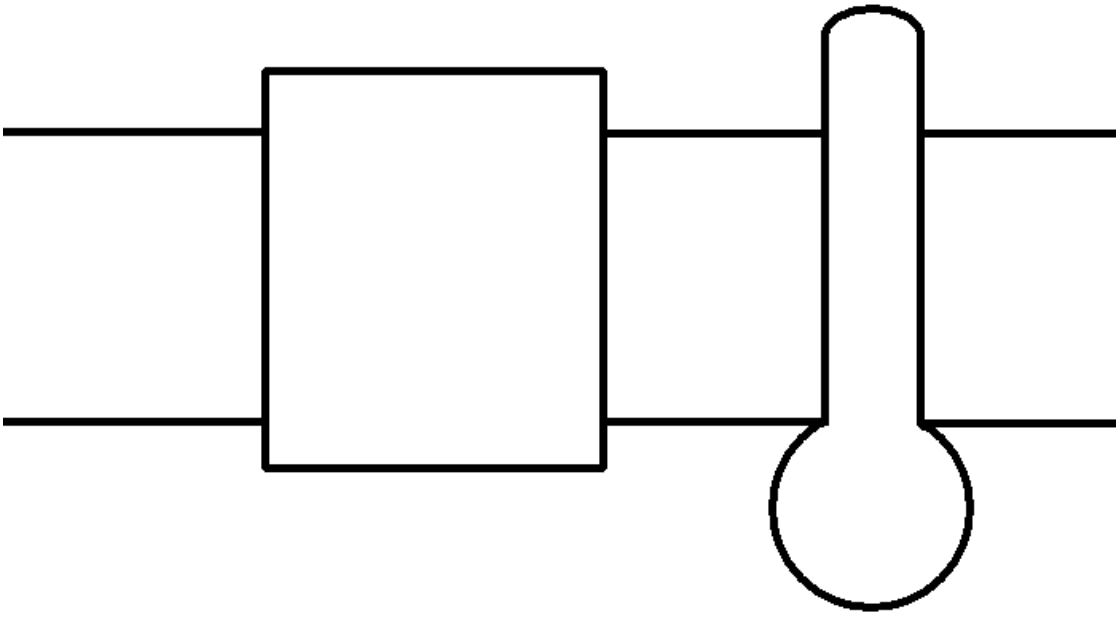
KREBS CYCLE SUMMARY PER PYRUVATE

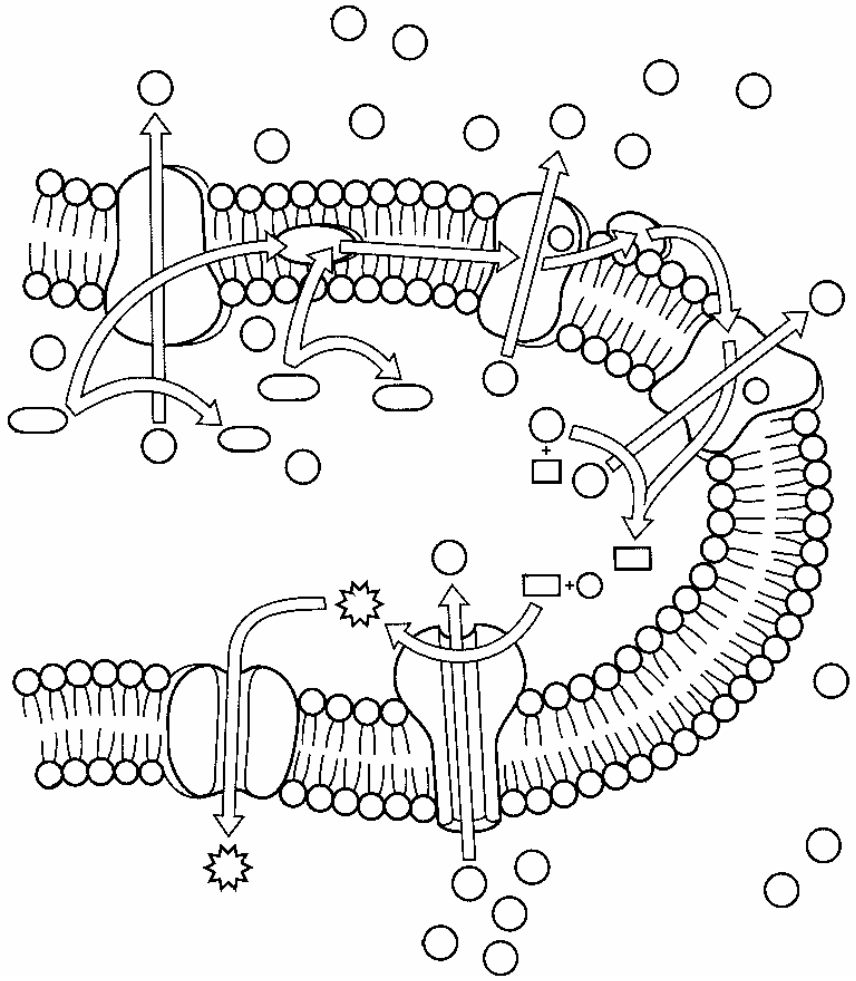
KREBS CYCLE IN	KREBS CYCLE OUT

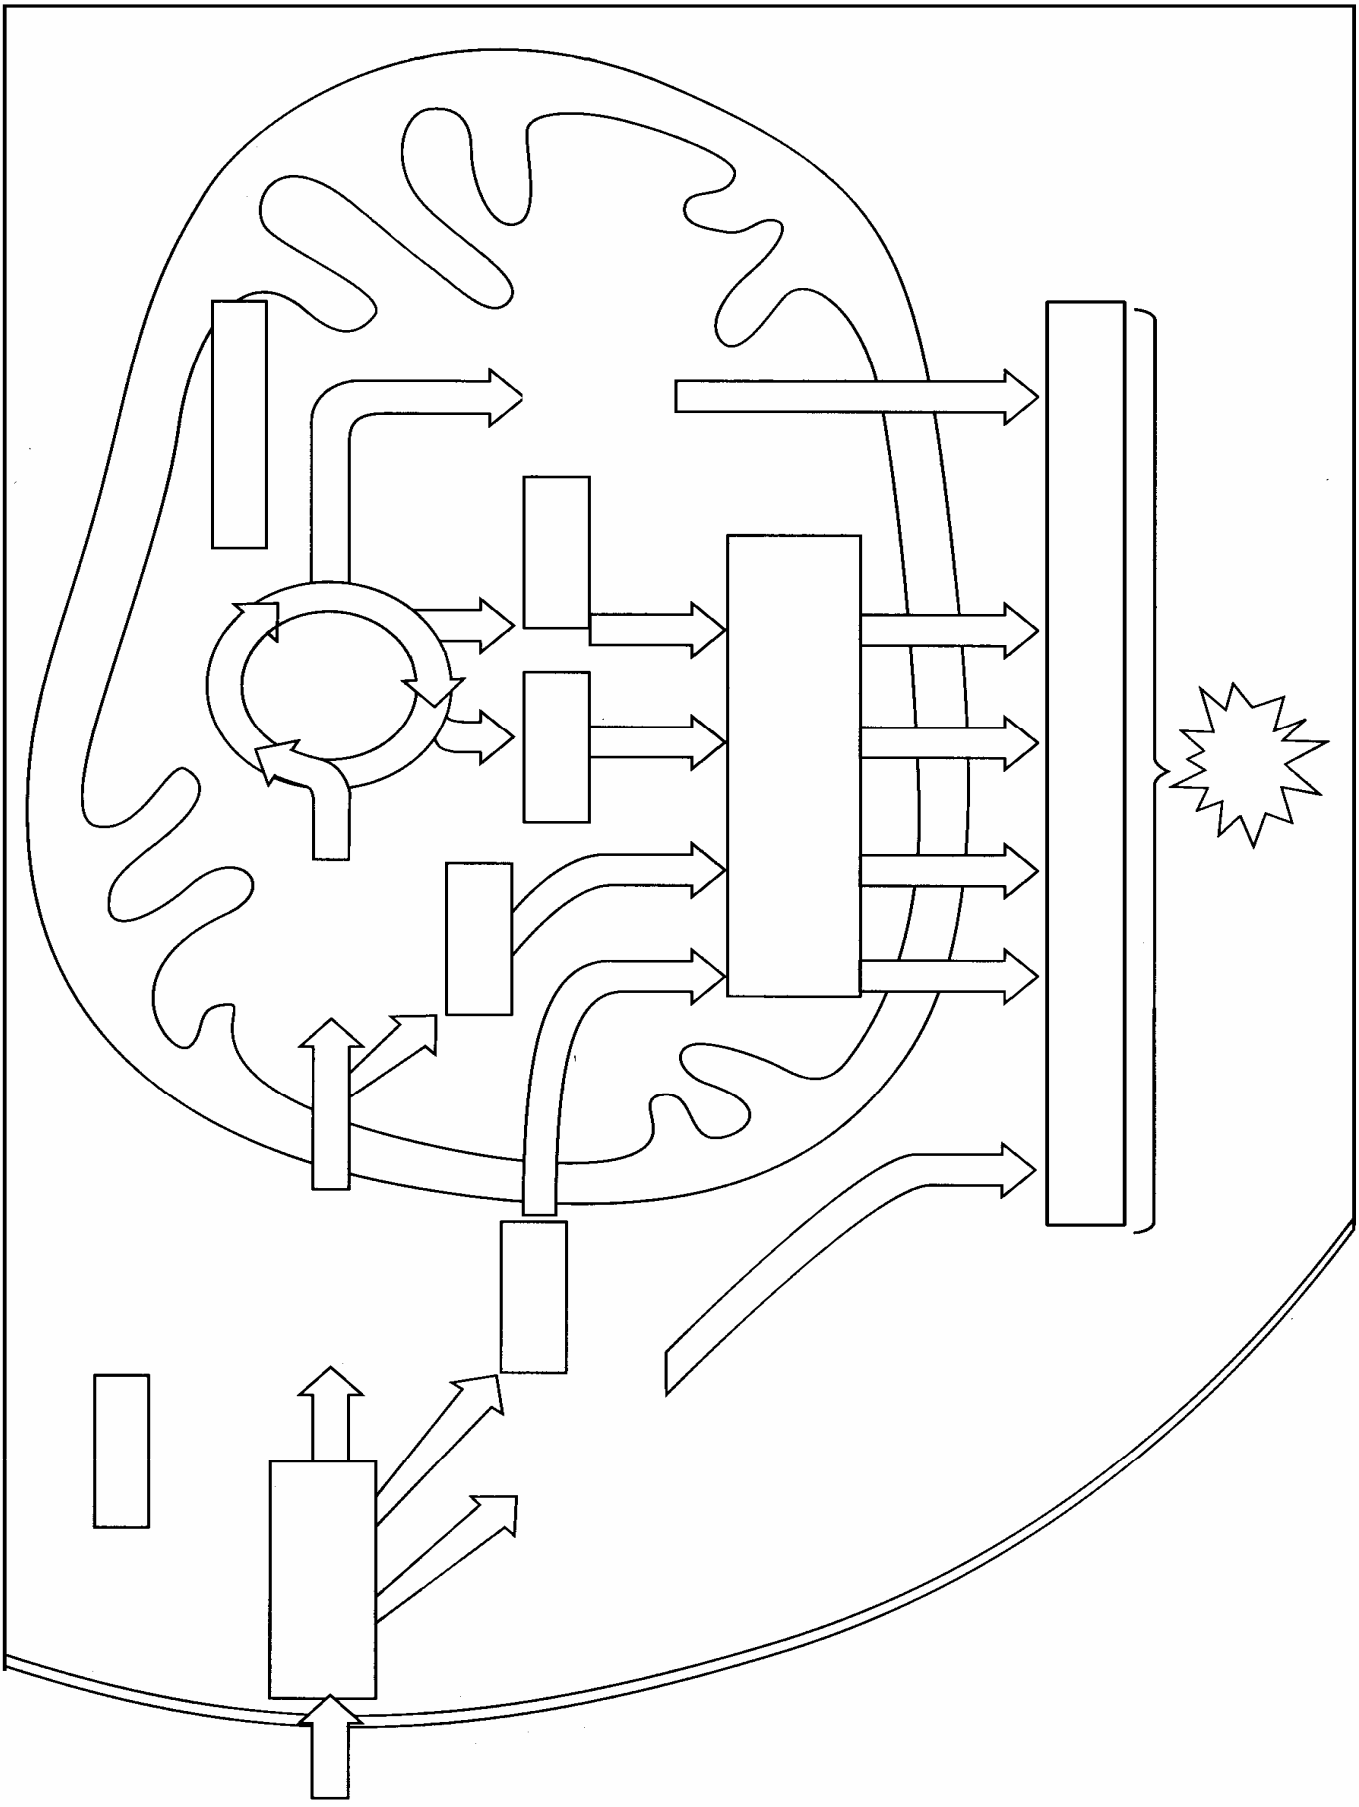
KREBS CYCLE SUMMARY PER GLUCOSE

KREBS CYCLE IN	KREBS CYCLE OUT

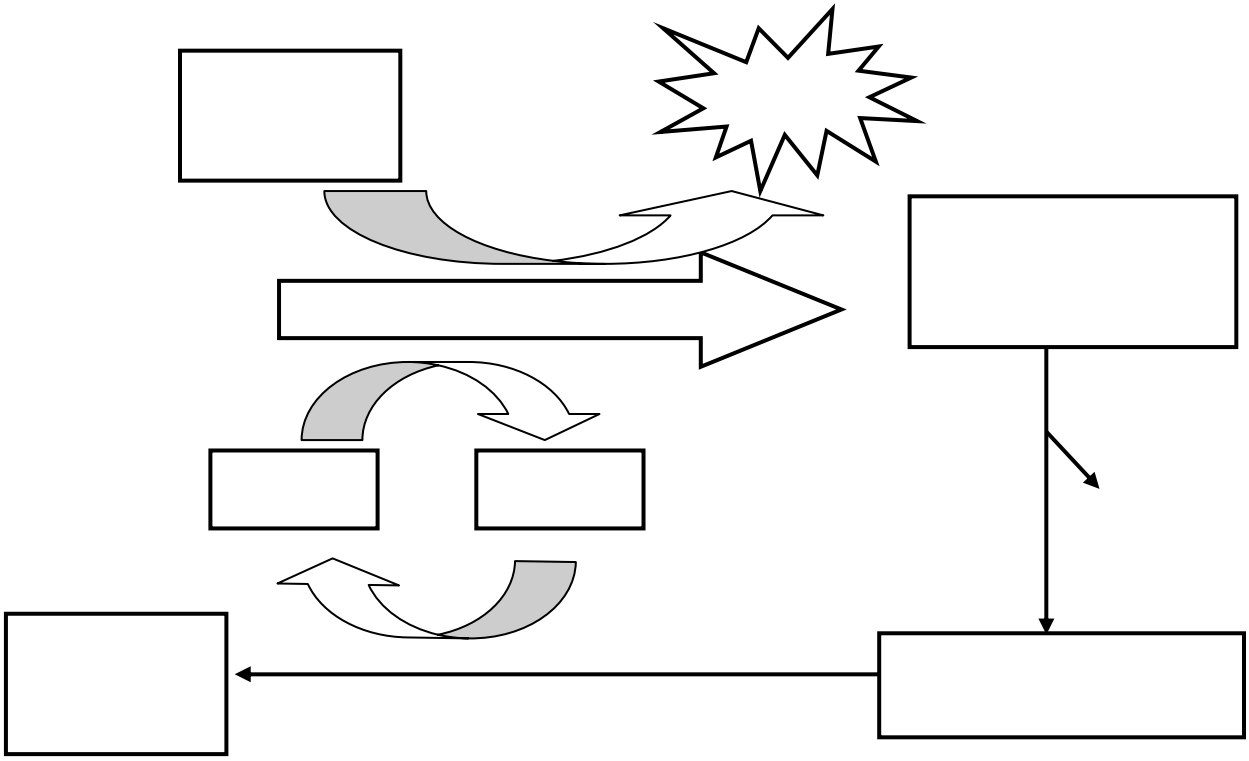
ELECTRON TRANSPORT & OXIDATIVE PHOSPHORYLATION



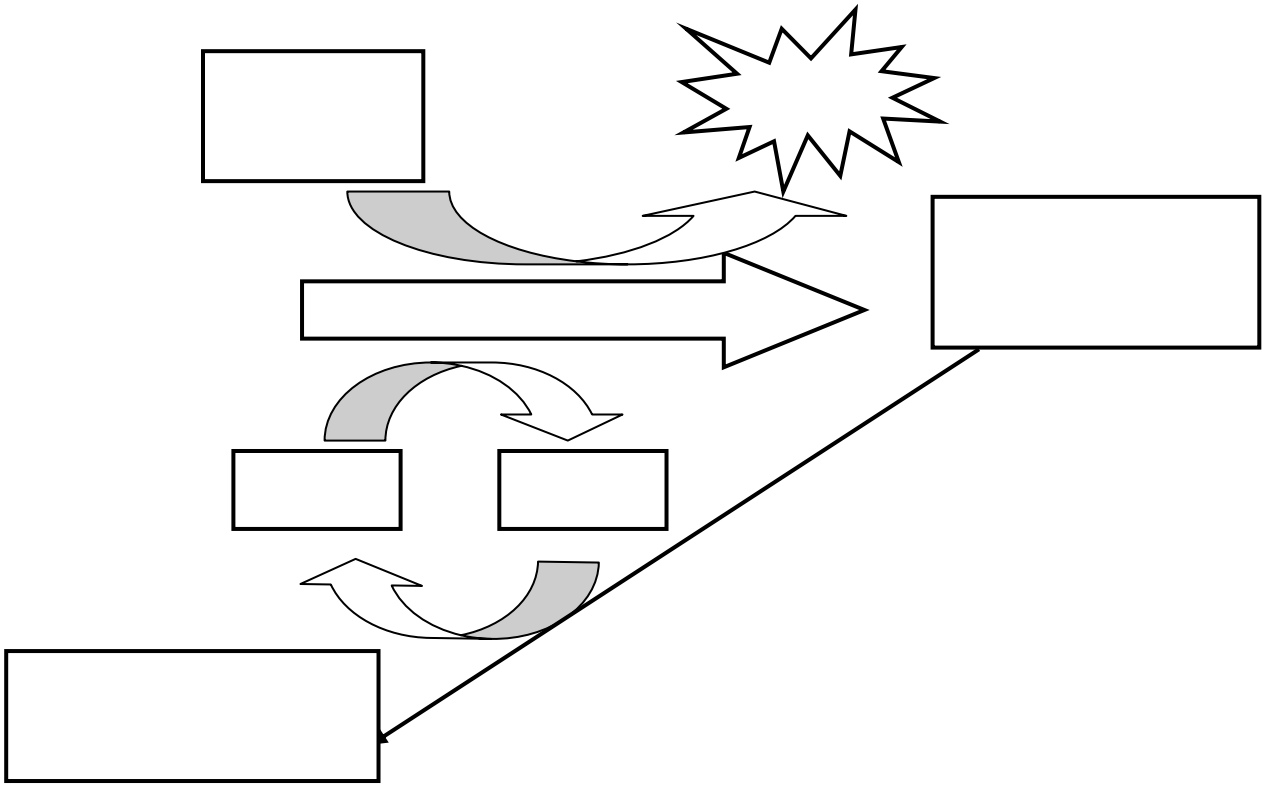




ALCOHOL FERMENTATION



LACTIC ACID FERMENTATION



QUESTIONS

1. Use your textbook to answer the following questions.

   a. In general, describe what happens during photosynthesis.

   _____

   b. What are the reactants in photosynthesis?

   _____

   c. What are the products of photosynthesis?

   _____

   d. Where in the cell does photosynthesis occur?_____

   e. In general, describe what happens during cellular respiration.

   _____

   f. What are the reactants in cellular respiration?

   _____

   g. What are the products of cellular respiration?

   _____

   h. What substance(s) is(are) recycled?_____

   i. What substance(s) is(are) not recycled?_____

   j. Which reaction (photosynthesis or cellular respiration) is:

   Anabolic?_____

   Catabolic?_____

   Exergonic?_____

   Endergonic?_____

2. Write the summary equation for cellular respiration.

_____

3. Most commonly glucose is represented as the molecule broken down in the respiration equation. Does this mean that glucose is the only source of energy (fuel) in cellular respiration? Explain.

_____

_____

4. Define:

   a. Oxidation: _____

   b. Reduction: _____

5. Cellular respiration is described as a stepwise redox reaction.

   a. What substance is oxidized?_____

   b. What substance is reduced?_____

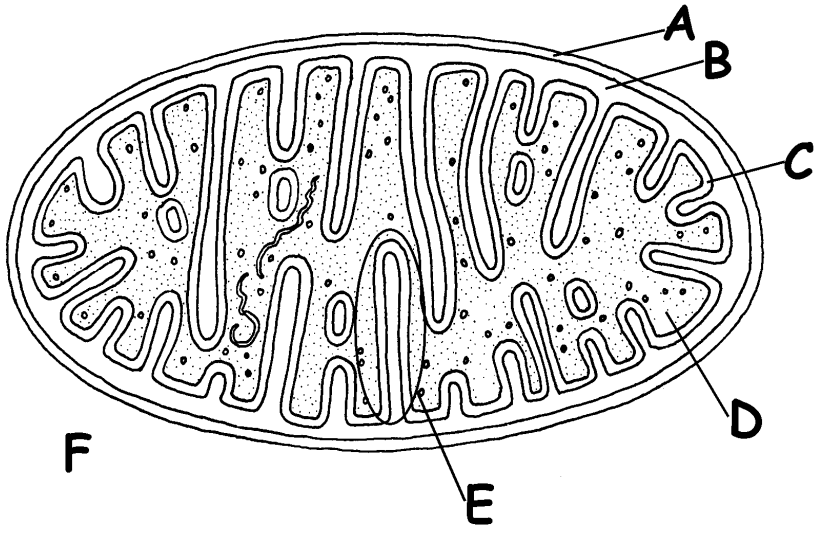
6. What happens to the amount of potential energy of electrons as they shift from carbon and hydrogen toward oxygen in cellular respiration?

_____

7. What is the role of NAD+ in cellular respiration?

_____

10. Use the diagram below to answer the questions that follow:



_____ Outer membrane

_____ Inner membrane

_____ Cytoplasm

_____ Matrix

_____ Intermembrane space

_____ Crista

_____ Site of glycolysis

_____ Site of Krebs cycle

_____ Location of electron transport chain

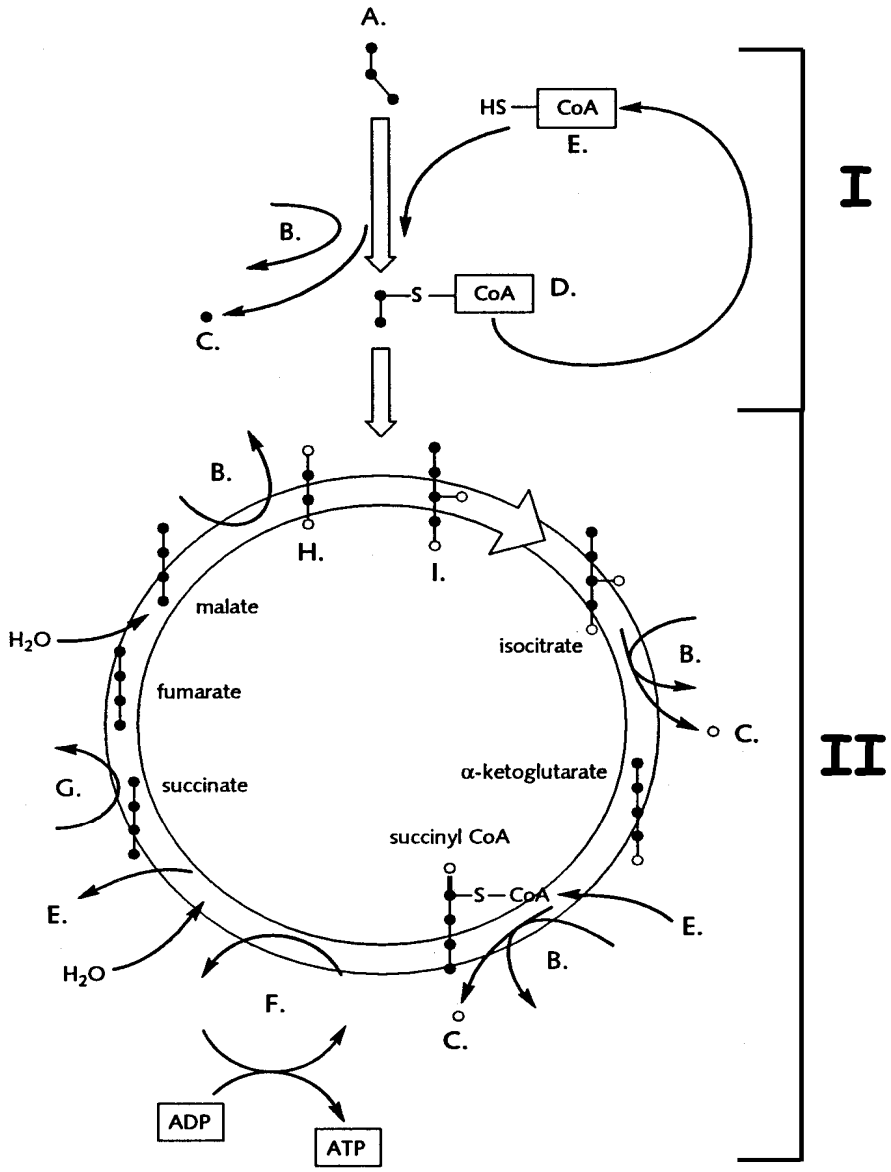
_____ High $[H^+]$

_____ Location of ATP synthase molecules

14. List the reactants and products of glycolysis.

Reactants	Products

15. Use the diagram below to answer the questions that follow:



a. Identify the molecule represented by each of the following letters in the diagram.

A		**F**	
B		**G**	
C		**H**	
D		**I**	
E			

b. What process is occurring in the series of reactions labeled I?

_____

Where do these reactions occur within the cell (be specific)?

_____

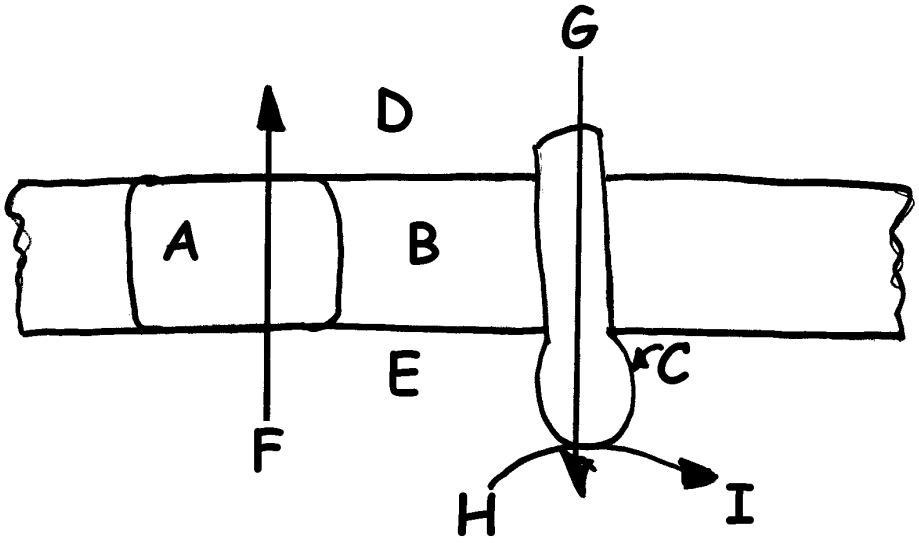
c. Complete the following chart by providing the number of each molecule produced per glucose molecule.

Molecule	# Produced per glucose	Molecule	# Produced per glucose
NADH		**ATP**	
CO_2		**$FADH_2$**	

16. What are the reactants and products of the Krebs cycle?

Reactants	Products

17. Use the diagram below to answer the questions that follow.



a. Identify the molecules/parts represented by each letter in the diagram.

A		**G**	
B		**H**	
C		**I**	
F			

b. Where is this structure located within the cell (be specific)?

_____

c. Which letter represents:

High H+ concentration? _____

Low H+ concentration? _____

Mitochondria matrix? _____

Inner membrane? _____

Intermembrane space? _____

d. Describe what is happening in this diagram.

_____

_____

_____

_____

19. As electrons are transported through the electron transport chain to oxygen, they lose potential energy. This energy is used to do what work?

_____

22. What are the reactants and products of electron transport & oxidative phosphorylation?

Reactants	Products

23. Account for the 36 ATP molecules produced from the complete oxidation of 1 glucose molecule.

_____

_____

_____

_____

_____

24. Some desert animals such as the kangaroo rat never have to drink water. Explain how kangaroo rats can obtain the water they need to survive from the dry seeds they eat.

_____

_____

25. How is aerobic respiration different from anaerobic respiration?

Aerobic Respiration	Anaerobic Respiration

28. Define the following terms:

Strict Aerobes	
Strict Anaerobes	
Facultative Anaerobes
